SUMMARY

Front-End Developer with experience in developing responsive and high-performance web applications using modern frameworks. Focused on clean, maintainable code, performance optimization, and user-centric design. Skilled in leveraging AI-powered tools to improve development efficiency and deliver scalable, production-ready solutions in collaborative environments.

WORK EXPERIENCE

Front-End Developer | Freelance / Short-term Project

cumulocode

📅 10/2025 - 11/2025 📍 Remote

Software company delivering **scalable web and mobile applications** using modern technologies and best practices.

- Refactored a monolithic front-end component into modular, reusable components, improving code readability by ~40% and simplifying long-term maintenance.
- Implemented **Dark Mode** and multi-language support (**English**) for better user experience.
- Ensured **responsive design** and **cross-browser compatibility**.
- Collaborated with the existing codebase to deliver **clean and maintainable updates**.

XtraMarket (Self-Employed)

Built a scalable E-commerce platform with Next.js and RTK Query, featuring advanced product filtering, cart & wishlist, Stripe payment integration, and an admin dashboard for products and orders with secure auth and backend integration.

🔗 [Live Demo](#) | [Code](#)

Prime Ecommerce (Self-Employed)

E-commerce application built with React, Redux Toolkit, and TypeScript, offering product search, cart and wishlist functionality, discounts, secure Firebase authentication, and an admin dashboard integrated with Firebase backend.

🔗 [Live Demo](#) | [Code](#)

CarePlus Clinic (Self-Employed)

Clinic management app built with Next.js, TypeScript, and Redux Toolkit, offering secure authentication, appointment booking, and patient profile management. The application is connected to a real backend API for handling data, users, and business logic.
